

Getting Wild!

Seven Steps to Restoring Biodiversity in Your Yard

Presented by Lynn Kunstman

Saturday, February 21st | 2:30-3:45 pm
SOREC Extension Building (small classroom)
569 Hanley Road, Central Point

Planting native plants is crucial to our ecosystem health and to preserving and protecting life on earth. Plant choice matters, and choosing native plants helps to restore and ensure vital ecosystem services in our landscapes. Based on the work of Dr. Doug Tallamy, this presentation outlines seven steps you can take to create healthy, productive gardens, and help save our disappearing pollinators and birds. Snacks and drinks will be provided.

About Lynn Kunstman

Lynn has a degree in Wildlife Management from Humboldt State University and, a Masters of Science in Education from SOU. In 2023 she was named Oregon State Master Gardener of the Year. She established and runs the native plants nursery at Jackson County Extension Campus.
